

Dirigo Building Science Engineers is committed to providing high-quality, innovative engineering solutions to today's ever increasingly complex building codes.

Dirigo Building Science Engineers provides professional services to our clients, including:

- Project Management/Owner's Representation
- Forensic Engineering
- Infrastructure Planning/Design
- Civil Engineering
- Permitting
- Building Envelope Design
- Structural Engineering
- Fire Marshal Approval/Life Safety Design
- MUBEC Special Inspection Services
- Building Information Modeling (BIM)
- Construction Contract Administration
- Facilities Management

We provide these services with a staff that offers over 80 years of engineering experience and over 20 years of construction management experience. We utilize this experience to serve our clients, and we build toward the future by teaching some of the best up-and-coming engineers and detailers.

Some of the experience of Dirigo BSE's staff is shown above in the photos of the Bangor Police Department, the Webber West office building on the campus of Eastern Maine Medical Center, and Old Town Elementary School.

Dirigo Building Science Engineers is dedicated to providing creative and cost-efficient engineering solutions that bring our Client's vision to life while ensuring safety and functionality. Our goal with every project is to exceed our client's expectations of what an engineering firm can provide for them.

Our first and corporate office is located in Downtown Bangor. We support local area businesses and consider Bangor home.
