

## HEBRON ACADEMY – ATHLETIC FACILITY

### PROJECT DESCRIPTION:

When Hebron Academy had a vision of future growth and competitiveness, they began with a new athletic facility. This building houses several racquetball courts, locker facilities, fitness and multipurpose rooms, a climbing wall, and an indoor elevated running track. This comprehensive structure will serve the Academy well into the future while its design incorporates elements of its past.

**VALUE: \$12M**

### PROJECT LOCATION:

Hebron, Maine

### SERVICES PROVIDED:

Structural Engineer of Record responsible for the design, details, and coordination of foundation and framing plans and details with multiple deliverable bid packages. Routine structural, building envelope inspections, as well as special inspections were performed during construction.

**SIZE:** 55,000 SF

### CLIENTS:

**WARREN**  
CONSTRUCTION GROUP, LLC

**ROLE:** While with another firm, Ronald W. Rideout, PE, directly managed two detailers and one engineer and coordinated with the contractor, project manager, architect, architectural job captain, and mechanical engineer to deliver the foundation and building envelope on a fast track, design-build delivery method.
