

George A. Gallagher

Senior CAD/Revit Detailer, QA/QC Specialist

George is a highly skilled Drafter and QA/QA specialist that has been in the engineering services business for over 10 years. His experiences include electrical, mechanical, structural and civil drafting. George earned a degree in electrical and automation technology that gave him the skills to work with all aspects of electricity from basic residential electricity, AC/DC motors, and digital electronics to programming PLCs. For his senior project, he was part of a team that designed, built, and programmed an automated assembly line. George is a fully licensed and insured drone pilot providing professional aerial photography and video. George is a native of the Katahdin region and worked on design and layout of the Medway School athletic field restoration project. He firmly believes people need to be moving to the Katahdin region, not moving away from it. George's vast experiences will allow him to work with maintenance and inspection operations of a CLT (cross-laminated timber) facility and CNC facilities that will be constructed throughout New England to keep up with the demands of CLT panel suppliers.

- UAS commercial pilot's license
- Fully licensed and insured drone pilot

Qualifications Summary

- Professional experience in the engineering services business for over 10 years
- Extensive computer skills
- Strong attention to detail
- Excellent communications skills

Professional Experience

Senior CAD/Revit Detailer, QA/QC Specialist | Dirigo Building Science Engineers, LLC | Veazie, Maine

Serves as the hub to all of our professional service providers. Responsible for maintaining superior training to staff in the production of facility models and construction documents. George will work closely with our alliances, that include the University of Maine, Eastern Maine Community to create an advanced work force in the building sciences and mass timber industry. George's background positions him well to be an eventual facilities manager, operation manager and structural engineer for a CLT facility. His motivation, drive, and experiences will propel his career at Dirigo over the next 15 years — putting him in control of his own destiny.

CAD Designer/Detailer & Quality Control Manager | D&S Engineering Inc./Mid-South Engineering Company | Orono, Maine

Produced electrical, mechanical, structural and civil drafting and design. Drew and designed electrical plans for various jobs and clients. Worked as QA/QC manager. Responsible for all client-issued drawings. Functioned as quality control specialist, creating and managing drawing and database systems (paper and electronically), drawing lists, purchasing, RFP and PO management, specifications, project coordination and job procurement. Provided IT support and management, web design, networking, software and hardware management, system setup and troubleshooting. Certified and fully licensed commercial drone pilot for the company, flying project missions as required.

PSE (Postal Support Employee) 218 | United States Postal Service | Winn, Maine

Work as process and distribution clerk. Sort mail and function as shipping and services specialist.

Fingerprinting Operator | U.S. Census Bureau | Bangor, Maine

Possessed the proper security clearance to electronically fingerprint, wet fingerprint and photo I.D. based on the individual's needs. Functioned as an I.T. and technology expert.

Laboratory Phlebotomist | CARY Medical Center | Caribou, Maine

Worked as a phlebotomist within all areas of the hospital taking and receiving specimens from patients based on medical needs. Functioned as a laboratory assistant in all areas of the lab, performing various laboratory tasks.
