

## Paul Hodge

### Building Systems Developer

Paul is the quintessential jack of all trades, having spent his career in the construction industry developing a wide variety of skills including operation of all construction tools and machinery.

Whether working for himself or for others, Paul takes great pride in a job well done. His reliability and professionalism are top notch. And, because he has grown in construction trade knowledge by learning hands on, he appreciates all aspects of the final work product. He understands what goes into each step of building.

Throughout his career, Paul has worked on steel framed buildings and most recently modular-built buildings. He understands this industry and his knowledge goes well beyond that of your average contractor.

Paul has acted as a supervisor, leading teams of people, allowing him to share his knowledge and expertise and appreciation for the work.
